The most reliable and effective rescue tool for armoured glass breaching

The Rescue Ripper is a manual entry tool that quickly and effectively breaches armoured glass which can include windscreens or other glass panels on armoured SUV's and light vehicles such as protected land rovers and light protected vehicle. The system is capable of being used on some larger 'IFV' vehicle also - Glass weight and size dependant.

-100% safe for users and occupants, no explosives or power tools

-No batteries that require charging or that can fail or overheat during critical moments

Procedure for use

1. Retrieve the Rescue Ripper and attach the anchor point onto another vehicle

2. Penetrate the glass with the Rescue Ripper

3. Rip the glass out of the vehicle

4. Extract personnel through the created hole

5. Depart

Previously used by multiple FIVEYES nations on deployment within middle east conditions. Currently in full use with Australian SOF and multiple other agencies.
